11.To compare AI-generated content with student-created content and understand limitations of AI.

a) Write a 100–150 word paragraph on the topic: "Will AI replace jobs or change them?"

(This must be written by the student.)

Online learning offers College students flexibility and Convenience, but whether it is better than offline learing styles. Virtual classes allow students to manage their schedules, access recorded lectures, and learn from anywhere, which is especially helpful for working students or those with long Commutes. However, offline learning Provides face-to-face interaction, immediate feedback, and a structured environment that many students find motivating. Traditional classrooms also encourage social Connections and collaborative learning. ultimately, online learning can be highly effective when students are disciplined and tech-savve but offline learning remains valuable for those who benefit from in-person engagement and a more guided academic experience

b) Ask any AI tool (ChatGPT/Gemini/Copilot) to write the same topic.

From an analytical perspective, determining whether online learning is superior to offline learning for college students depends on multiple performance variables. Online learning optimizes efficiency by allowing students to access content asynchronously, adjust their pace, and utilize digital tools for personalized study patterns. This mode also reduces logistical constraints such as travel time. However, offline learning provides higher engagement bandwidth through direct human interaction, immediate clarification of complex concepts, and a structured academic environment. These factors can enhance motivation and retention. Therefore, online learning is advantageous for flexibility and scalability, while offline learning remains beneficial for students who require real-time feedback, social presence, and consistent external guidance.

d) In your practical copy, create a Comparison Table with the headings: I. Human-Generated Content II. AI-Generated Content

Aspect	Human-Generated Content	AI-Generated Content
Creativity	More emotional and personal	Creative but pattern-based
Originality	Unique perspective	May feel similar or generic
Accuracy	Depends on writer's knowledge	Usually accurate but can be wrong
Speed	Slower, takes time	Very fast
Tone	Natural and expressive	Consistent but less emotional
Use	Best for stories, opinions	Best for quick info and drafts
